(VICE CHAIR CPG, CHAIR CPG PTC)

WRC-23 Agenda items 9.1

CEPT Co-coordinators:
Hans BLONDEEL TIMMERMAN (HOL)
Jean CHENEBAULT (F)

WRC-23 Agenda item 9.1, topic b

*Review of the amateur service and the amateur-satellite service allocations in the frequency band 1 240-1 300 MHz to determine if additional measures are required to ensure protection of the radionavigation-satellite (space-to-Earth) service operating in the same band in accordance with Resolution **774 (WRC-19)***

Background

Harmful interference caused by emissions from amateur radio stations into stations of the GNSS were observed

WRC-23 invited the Radiocommunication Sector to study the matter and report to WRC-23

Preliminary CEPT position

CEPT supports the protection of the RNSS.

CEPT supports the development of a new ITU-R Report or Recommendation to provide guidance towards the implementation of technical and operational measures for the continued use of the frequency band 1240-1300 MHz by the Amateur and Amateur-satellite services in accordance with the RR in order to protect the RNSS.

CEPT supports that above mentioned measures to be applied on the use of secondary Amateur and Amateur-satellite services, should be based on the results of co-existence studies and measurement campaigns.
