**Cc:** Jaap Steenge  
**Betreff:** Liaison from PT B to PT A

Dear Alexander,

In document CPGPTA(2011)002, a liaison statement from PT B to PT A, PT B commented on a proposal from Germany for a WRC-16 agenda item with the objective to extend the existing EESS and SRS allocations (active) in the band 9 300 – 9 900 MHz by at least 600 MHz within the frequency range 8 700 – 10 500 GHz.

PTB indicated in its aforementioned LS that it had decided to consider the issue further at its next meeting.

During our meeting, 31 May - 1 June 2011, PT B concluded that there is a need for a compatibility study between EESS(a) and SRS(a) and the Radio Astronomy in order to safeguard the coexistence between these services.

Kind regards  
Chrisvan Diepenbeek  
Chairman CPG PT B
