Public consultation of Draft amended ECC Decision (04)10 ("The frequency bands to be designated for the temporary introduction of Automotive Short Range Radars (SRR)")

Dear Mr Weber,

Germany supports the final adoption of the current version of the Draft amended ECC Decision (04)10 ("The frequency bands to be designated for the temporary introduction of Automotive Short Range Radars (SRR)") as adopted for public consultation by WG FM in October 2011.

Some editorial amendments, as provided in the attached file, are also proposed. They have been highlighted in green in order to distinguish them from the other amendments. These editorial amendments are not related to the substance of the Decision and should not contradict the final adoption (explanations are provided in comments "BNetzA-1 to 4" in the attached document). Inter alia, the sentences regarding the type-approval for motor vehicles have been aligned with the corresponding sentence in the relevant Commission Decision.

Yours sincerely
