Brussels, 2 September 2011

Dear Sirs,

The automotive industry within the European Automotive Manufacturers Association (ACEA) and the European Association of Automotive Suppliers (CLEPA) appreciate and welcome the CEPT activities within the SRD/MG and the FM WG to consider extension of the UHF frequency bands for short range devices in accordance with the agreed roadmap for this activity.

The automotive industry would like provide the attached contribution to this work based on the existing and new radio services to be implemented within the next 10-15 years. It is very important to the automotive industry that long term sustainable frequency planning is achieved and we are therefore prepared to work with the CEPT and the European Commission to find acceptable solutions.

Best regards

Dolf Lamerigts
ACEA

Pierre Laurent
CLEPA
