Director-General

Brussels,  
DG CNECT/B4/BST/SDD

Mr Eric Fournier  
Chairman CEPT ECC  
ANFR  
78 avenue du Général de Gaulle  
94704 Maisons-Alfort  
France

**Mandate to CEPT to review the harmonised technical conditions for certain EU-harmonised frequency bands and to develop least restrictive harmonised technical conditions suitable for next-generation (5G) terrestrial wireless systems**

Dear Mr Fournier,

Considering Article 4(2) of the Radio Spectrum Decision 676/2002/EC of the European Parliament and of the Council, and the favourable opinion (by a written procedure) adopted on 5 September 2018 by the Radio Spectrum Committee in accordance with the advisory procedure under Regulation 182/2011/EU, I am pleased to issue to CEPT the following mandate (attached):

“Mandate to CEPT to review the harmonised technical conditions for certain EU-harmonised frequency bands and to develop least restrictive harmonised technical conditions suitable for next-generation (5G) terrestrial wireless systems”.

The scope of the mandate comprises the development of 5G-ready technical conditions in the framework of technology and service neutrality for four relevant EU-harmonised frequency bands: 900 MHz, 1800 MHz, paired terrestrial 2 GHz and 2.6 GHz.

Upon completion of the mandate, I would appreciate receiving from CEPT the deliverables called for in the mandate, along with an explanatory note on how the tasks have been accomplished.

Should you have any further queries, do not hesitate to contact Mr Andreas Geiss, Chairman of the Radio Spectrum Committee (+32.2.29.59466).

Yours sincerely,

(e-Signed)  
Roberto Viola
