

***LONG TERM VISION
FOR THE UHF BROADCASTING BAND***

CEPT TG 6 Chairman
Jaime Afonso

9th Annual Spectrum Management European Conference
Brussels, 17-18 June 2014

The background

■ The “UHF broadcasting band”

“Salami slicing” ?

- Strategic vision, focusing in the 470-694 MHz band;
- Consider the demand and supply, e.g. broadcasting, wireless broadband and other applications;
- Identify and analyse possible scenarios

The studies

■ **ECC Report almost completed**

■ **It addresses**

- ▶ The existing situation
- ▶ Evolution of technology, networks and services
- ▶ Description and assessment of scenarios

■ **The conclusions/recommendations:**

- ▶ The diversity (e.g. availability of spectrum, DTT platform penetration, etc..)
- ▶ Cross-border coordination analysis
- ▶ The long term(?)/ migration issues
- ▶ Indicators
- ▶ Regulatory impact
