Valencia, 19th January 2017

Dear Mr. Carrascosa,

It is my pleasure to invite you to give a conference on the subject "Introduction to SEAMCAT: Spectrum Engineering Monte Carlo Analysis Tool" at the Institute of Telecommunication and Multimedia Applications (iTEAM) of the Universidad Politécnica de Valencia in Spain. As agreed, the conference will take place on Wednesday March 22nd, 2017.

Since some of our research groups work on advanced techniques for wireless communications and spectrum management, I believe your insightful lecture on the SEAMCAT tool will be of great interest for us. It will also provide us a very interesting vision on the spectrum management carried out by international institutions as the CEPT, for which the European Communications Office is the permanent supporting office.

I look forward to hearing from your response.

Sincerely,

 **iTEAM** 
INSTITUTO DE TELECOMUNICACIONES Y
APLICACIONES MULTIMEDIA
