International Journal of Postal Communications - IJPCOM

The journal consists of two parts – scientific and professional.

Part I – scientific papers concerning the scope of journal are published. Only original papers not previously published or simultaneously submitted for publishing elsewhere, should be submitted. Review process is held by eminent experts. High quality manuscripts are peer-reviewed by minimum two peers. The journal follows a strict double blind review policy to ensure neutral evaluation.

Part II – articles from the field of postal services, technologies, infrastructure and regulation are published. These articles are reviewed by the editor and members of editorial board. In this part simplified information on scientific research or discoveries can be found, as well as up-to-date information about current events in the field of postal industry.

Papers will only be published in English. The journal is a semi annually publication.
